REHABILITATION

Crown Park Rehabilitation and Nursing Center offers a supportive environment for people who have experienced a disabling injury or illness. Our experienced, rehabilitation professionals are dedicated to providing skilled and compassionate care using state-of-the-art equipment and individually-tailored therapy programs. At Crown Park we offer physical therapy, occupational therapy and speech therapy with our ultimate goal to help individuals return to a quality, productive, healthy life.

Admission is offered to individuals with intense rehabilitation goals who have a plan for increased functioning and an anticipated discharge of 2-6 weeks. Reservations for short term stays may be made in advance when scheduling surgery or just prior to leaving the hospital.

DEMENTIA CARE

Crown Park's Secure Alzheimer's and Dementia Care unit provides a safe and supportive environment for individuals with varying levels of dementia. Our mission is to provide mental, physical and emotional freedom for residents in the safest, least restrictive environment. Activities and exercise programs are specifically designed to help maintain strengths, abilities, and promote feelings of independence and personal dignity.

SPECIALITY CARE

Crown Park offers a 25 bed all male unit designed for the male patient that can benefit from a smaller secure unit with specialized activity programming and a consistent staff dedicated to meeting their individual needs.
