ATTENTION

As of March 10, 2021 members of our staff have tested positive for COVID-19.

Regarding facility visitation, per the strict directives and guidance of the New York State Governor's Office and Department of Health, any new onset of COVID-19 activity within the facility requires us to restrict visitation for no less than 14 days. This is for the health and safety of all our residents and staff. We will send out additional updates regarding resuming facility visitation as we progress and get closer to meeting all the criteria and guidelines as required by the Governor's Office and New York State Department of Health.

As always, if you are interested in scheduling a phone call or virtual visit with your loved one; please contact a member of the facility's social work department. We are happy to set this up for you.
